

# St. John Hospital and Medical Center:

## Integrating excellence in clinical care with spiritually-centered, holistic care

St. John Hospital and Medical Center (SJH&MC) has long been known for its excellence in medical care. Our clinical excellence includes:

- More than 50 medical and surgical specialties
- A Level Two Trauma Center
- Excellence in maternal/child services
- Many minimally invasive and robotic surgery options
- Comprehensive cardiac care
- Quality neurosciences
- A network of oncology specialties
- Comprehensive bone and joint care
- A thriving medical education program

But now, more than ever, SJH&MC is becoming known for its spiritually-centered, holistic care. We are striving to create an environment where we care for your body, mind and spirit, by anticipating your needs, helping to coordinate your care, and exceeding our patient's expectations. We believe our work is sacred, and our patients want clinically excellent treatment that also recognizes them as a person with loved ones, dreams and aspirations, and hope.

### Private patient rooms

SJH&MC has several new floors with all private patient rooms. Each of the 144 private patient rooms includes beautiful furniture and fixtures, private bathrooms and sofas, and a flat-screen television. Sound absorbing materials help maintain a quiet and peaceful environment. The floors have welcoming family waiting rooms, physician team conference rooms, architecture to support SJH&MC's migration to computerized charting, and custom nurse work spaces that keep the caregivers close to patients.

### Consolidated outpatient services

Many patients come to SJH&MC each day for diagnostic imaging or lab tests. These services are consolidated and located next to the atrium lobby, in a patient-friendly and accessible location. Free ground-level parking is conveniently located immediately outside the main Van Elslander Pavilion entrance.

22101 Moross Rd.  
Detroit, MI 48236  
313-343-4000

## Beautiful dining for patients and visitors

Our inpatients can access our “At your Request” room service, which offers patients a variety of salad, pasta, pizza, and entrees. For visitors, SJH&MC has the beautiful, airy Moross Market Café, which serves a variety of hot and cold food; Brioche Dorée, which offers French pastries, breakfast sandwiches, and specialty sandwiches, salads, and soups; and the Guild Coffee Shop, with hours throughout the day, afternoons, and night.

## Excellence in cardiac care

In keeping with the hospital’s role as a national leader in heart care, the W. Warren Sheldon Heart and Circulatory Center has been specially designed to offer an environment where specialists in cardiology, cardiovascular and vascular surgery, neurosurgery and radiology can collaborate to provide a cross-functional approach to patient care. The Center of Excellence houses five cath labs, two EP labs, and two interventional radiology labs, along with private pre-procedural recovery rooms.

## All private treatment rooms in Guild Emergency Center

The Guild Emergency Center (EC) offers patients more than 70 all private treatment rooms and a dedicated 64-slice CT scanner, helping staff to process imaging studies more quickly. The EC has received accreditation both as a Chest Pain Center and Heart Failure Center from the Society of Chest Pain Centers.

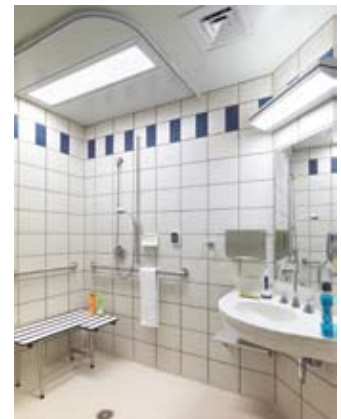

## Spa-like recovery in orthopedics and neurosurgery

Spinal surgical patients and neurosurgery patients have private rooms, and are part of the Body Spa program, receiving a special outfit to wear during their stay. Patients can have free massages, manicures and hair styling, and receive a gourmet meal for themselves and a guest during their recuperation. SJH&MC is a Blue Distinction Center for Hips & Knees and Spine Surgery.

## Leading cancer care

The Van Elslander Cancer Center combines leading-edge technology with great medical minds to form a multi-disciplinary approach to cancer care. In addition, our unique Healing Arts Center offers an array of complementary therapies, classes, holistic assessments and much more, all dedicated to healing the whole person—body, mind, and spirit.

## Palliative Care

We value you as a whole person. That is why our palliative care program focuses on the care of patients with chronic or advanced illness with equal attention to emotional and spiritual well-being. The goal of palliative care is to ease pain and suffering to help patients and their families achieve the highest quality of life.

## New services and technology

St. John Hospital continues to improve patient care, adding:

- The Center for Wound and Hyperbaric Medicine in 2009.
- The Cracchiolo Inpatient Rehabilitation Center in late 2010.
- A simulation lab to enrich the medical education experience.
- A new hybrid lab in Cardiovascular Services for specialized procedures (coming soon).
